6. Decentralized (on-chain) Exchange
7. The Conclusion
 - Roadmap and future development

1. The Introduction

DEFLECT PROTOCOL (DEFLCT) is an Ethereum network token that improves on the many forks of Reflect (RFI). The improvement of DEFLCT consist of upgraded tokenomics via an increased token burn rate, liquidity locking to prevent “rug pulls” which increases the decentralization value, and also provide utility functionality for other components of the DEFLECT ecosystem, featuring yield farming. As the crypto currency market grows, the technology has progressed accordingly, and many trading bots are making profits by repeating orders. We already know similar competitive robots with advanced computing performance, system logic, and algorithm completeness, and we will launch DEFLECT PROTOCOL(DEFLCT) token alongside DEFLCT Arbitrage-Bot with a higher level of competitiveness and also we will analyze, portfolio and volume for our user management. Providing complete platform services such as trackers, statistics, news, decentralized exchange and NFT marketplace.

With your help, DEFLECT PROTOCOL will build a world-class crypto ecosystem, powering the future of crypto finance.

What is cryptocurrency arbitrage: Cryptocurrency arbitrage is a transaction using the difference in market price between countries or cryptocurrency exchanges. The price of cryptocurrency arbitrage in Japan and abroad is different, that is, it uses a specific premium or reverse premium. Also, if the transaction is too crowded on the exchange, the difference between the market and other exchange will be used to make profit.

2. The Token API

AI-Powered DEFLECT PROTOCOL Platform for crypto traders

At DEFLECT PROTOCOL, We believe crypto adoption comes with easability, scability and user incentives. Hold DEFLCT token to get a global multiplier on all pools you are farming in the ecosystem. What this means is that by holding DEFLCT in your ETH address, or DEFLCT locked up in liquidity pools you control in your ETH address, you receive higher reward emissions. You can receive up to a 120% bonus on your stake by combining global multipliers and spendable boosts on pools. By designing DEFLECT PROTOCOL

around just this, we have delivered an easy-to-use token interface using a trusted API provider. An automated AI-based system with transaction services to support your financial stability is just a click away. The DEFLECT PROTOCOL platform provides an auto arbitrage BOT Algorithm. It is an essential solution for anyone who wants to make money from cryptocurrency trading. You can use the automated trading bot to customize your trading, and experience the trading service for your own automatic trading through our token API without accessing the exchange. The blockchain smart contract DEFLECT PROTOCOL(DEFLECT) token based on non-face-to-face trust allows anyone to access the platform service anytime, anywhere, regardless of national border. In order to become a global service, we will support English, Chinese, Japanese and Korean on all of our user interfaces. (The very initial release will be in English only.)

More languages will be added over time. Activities on the platform are based on mutual trust and believe. Using our token API provider, we are able to deliver a token that links together large centralized exchanges like Binance, Hotbit and others into one easy-to-use token trade interface. This gives users the benefits of using multiple exchanges without any complexity. We use centralized exchanges for their large liquidity and speed. This ensures users get the token at the best price possible.

3. About the DEFLECT PROTOCOL Ecosystem

Understanding the Tokenomics and Infrastructure

DEFLECT PROTOCOL Tokenomics are based on a finite supply of 500,000 tokens on the Ethereum and Polygon blockchain. This gives DEFLECT PROTOCOL(DEFLECT) scarcity and creates value as it becomes rarer over the long term. Creating DEFLECT PROTOCOL(DEFLECT) token with a finite supply made it so the staking pool would never dilute-out early stakers by inflation or under-reward later stakers due to deflation. This makes for a fair staking system. DEFLECT works by distributing 1.5% of every transaction to existing DEFLECT holders instantly, and automatically, after each transaction, with no action or GAS spending required by holders. This means holders gain value by way of additional tokens with each transaction conducted. In addition, an innovative deflationary function has been added where 0.75% of every

transaction is burned, removed from supply forever. Finally, to assure confidence from the community on future development of the project, a nominal 0.25% of transactions goes towards a development treasury fund. The percentage of fees you earn is calculated by the percentage of DEFLCT tokens. As an added bonus, holders receive lucrative multiplier bonuses in staking pools in the DEFLECT ecosystem. DEFLCT provides a native deflationary measure by taking an even more aggressive deflationary approach. This is where the 0.75% of each transaction is burned comes into play. Thus as supply dwindles at an increasing rate from ecosystem and community growth, prices can rise as tokens become more scarce over time.

Staking Pools

After the Liquidation generation event, two staking pools will be opened up to the public. These pools will be prior mentioned DEFLCT/ETH LP and DEFLCT/RFI LP pools. By providing either or LPs into the pools, you will be providing liquidity and gain the ability to earn rewards, multipliers, and bonuses.

DEFLECT PROTOCOL Arbitrage Trading-Bot

One of Japan's next-generation trading service that applies the latest financial trading techniques to cryptocurrency trading. The most distinctive feature is the application of 25 years of know-how securities career developers to cryptocurrency trading and the application of the 'artificial intelligence automatic trading system' which has been technically verified. This system not only provides an environment for investors to sleep easily with a simple set-up and minimum deposit, but also provides the value of increasing yields in virtual currency trading 24 hours a day, 365 days a year. In addition to this, novel trading in connection with professional traders, competitive financial firms of Japan financial IT, global quote and investment information analysis, information service, asset valuation system to check the return rate in real time, and smart alarm service to inform the change of virtual currency in real time applied as a differentiated service that was not present.

DEFLECT PROTOCOL Arbitrage Trading-Bot will introduce a breakthrough trading method through the convergence of artificial intelligence robot system, arbitrating and blockchain smart contract technology. In addition, the company will lead the next-generation market that leads the paradigm shift of the cryptocurrency exchange market as well as technical support through accumulated technologies such as the establishment of integrated security system worldwide.

The logo features a large, light-colored triangle composed of a grid of smaller triangles. At the base of this triangle, the word "DEFLECT" is written in a bold, white, sans-serif font.

DEFLECT

Our Revenue Model

DEFLECT PROTOCOL'S revenue will come from the following sources:

Source	Description
Arbitrage Trading-Bot	DEFLECT will offer 1.5% daily ROI(withdraw mode) for a cycle of 28 days and 5% daily ROI(compound mode) for a cycle of 3 months to all interested investors worldwide.
Withdrawal Fee	DEFLECT may charge a small fee for withdrawals.
Exchange Fee	DEFLECT initially will charge a 0.1% fixed fee per trade. Other variations will be subsequently introduced.
Listing Fee	DEFLECT will select innovative coins to be listed on the exchange and there may be a fee associated.
Other Fees	There may be other fees the platform may collect for various service such as automated algorithmic order etc.
Transaction Fees	1.5% (automatically distributed to DEFLECT token holders) + 0.25% developer treasury fund.
Token burn	0.75% of every transaction will be used to burn DEFLECT

4. Token-sale & token allocation

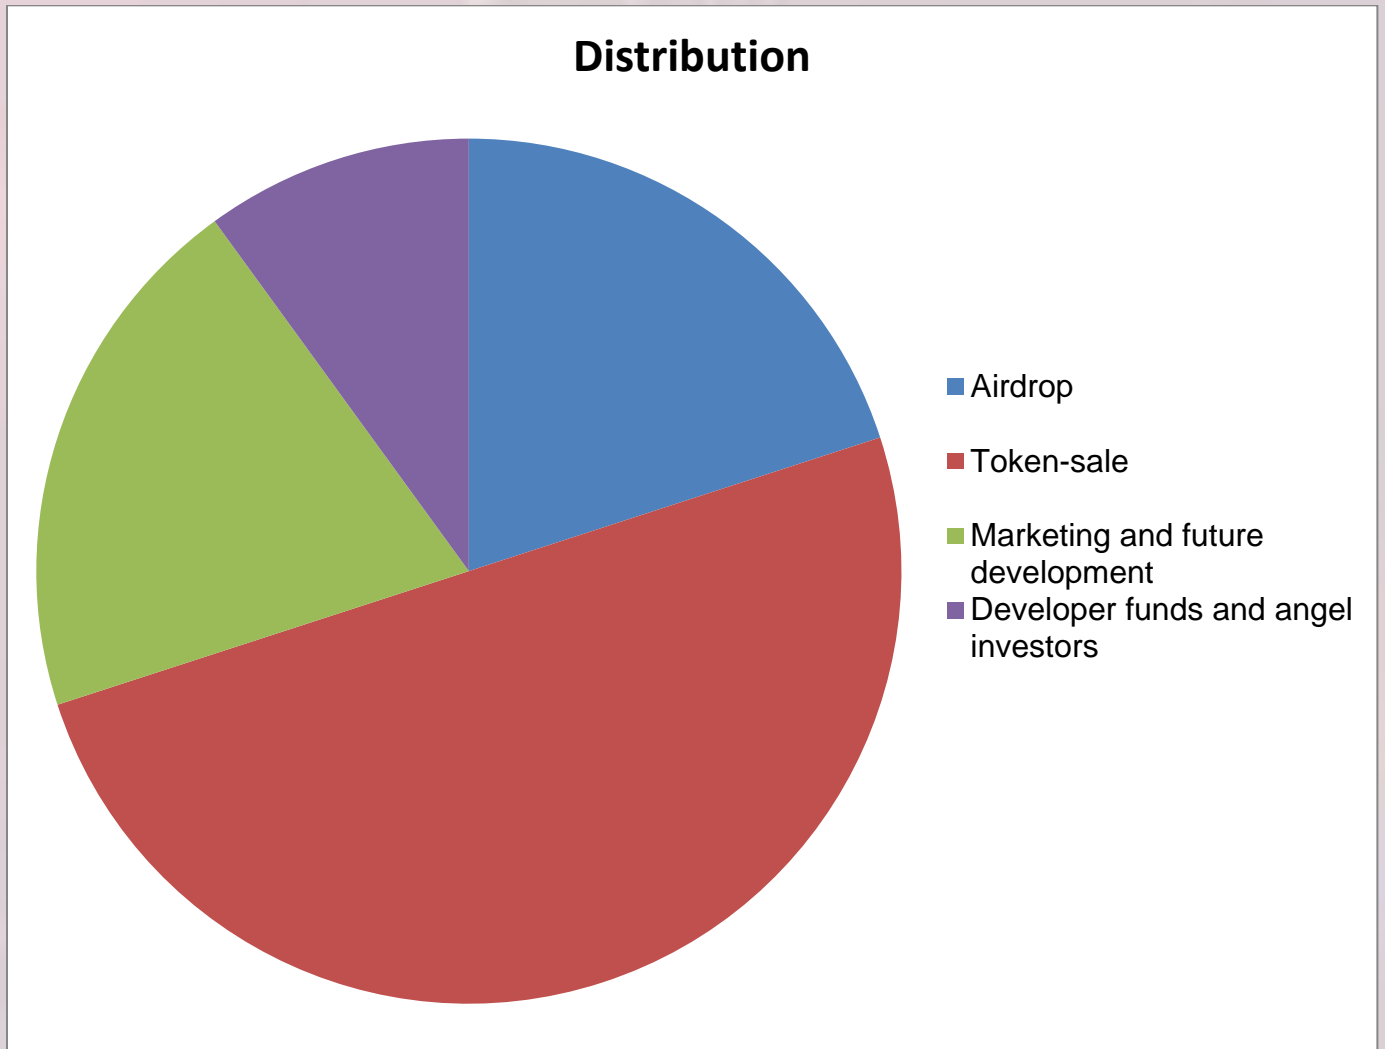

Token breakdown and Token-sale Schedule

The DEFLECT PROTOCOL(DEFLECT) token-sale will be held for users to obtain DEFLECT PROTOCOL (DEFLECT) tokens early while generating funds for future development.

The Token Sale will be done in ETH and MATIC on the platform official website.

Allocation

%	Amount(DEFLECT)	Participant
20%	100,000	Airdrop
50%	250,000	Token-sale
20%	100,000	Marketing & Future development
10%	50,000	Developer funds and angel investors

Token-sale Schedule

During the token-sale, Investors can purchase DEFLCT tokens in 4 phases on a first-come, first-

served basis until 250,000 tokens are sold. As each new phase starts, the price will increase.

Investors will receive DEFLCT tokens within 5 working days after the token-sale finishes.

The detailed schedule is as below:

Token-sale Phase	1 st week	2 nd week	3 rd week	4 th week
1ETH	Based on future market price			
1MATIC	Based on future market price			

DEFLCT Value

You can use DEFLCT to pay for any fees on our platform, including NFT purchase on our NFT Marketplace but not limited to:

- Exchange fees
- Withdrawal fees
- Listing fees
- Any other fee

When you use DEFLCT to pay for fees, you will receive a significant discount:

	1 st year	2 nd year	3 rd year	4 th year	5 th year
Discount Rate	50%	25%	12.5%	6.75%	no discount

5. DEFLECT PROTOCOL NFT Marketplace

The NFT Marketplace is considered part of the “Deflect Protocol Services” as defined in the Deflect Protocol Terms of use (“DEFLECT Protocol Terms”) set forth here. Company is a “Deflect Protocol Operator” under the Deflect Protocol Terms. The Deflect Protocol terms are incorporated by reference into these NFT Terms, and also govern your use and access of the NFT Marketplace. In the event of a conflict between these terms of these NFT Terms and the Deflect Protocol Terms, the NFT Terms will supersede and control.

The Deflect Protocol NFT Marketplace provides you the latest web3.0 new generation internet services to create (or as we call it, mint), sell, purchase, bid on,

collect, trade, showcase and otherwise transact digital blockchain collectibles, which may be represented as a non-fungible token (“NFT”) linked with certain digital media and art (“NFT Media”). We facilitate transactions between buyer and seller of an NFT, but we are not a party to any agreement between buyer and seller of an NFT on the NFT Marketplace. We collect revenue on the NFT Marketplace via transaction fees and other applicable fees which we display when you interact with the NFT Marketplace. For the avoidance of doubts, NFT transacted on the Deflect Protocol NFT Marketplace are considered “Digital Assets” as defined in Deflect Protocol Terms. The company reserves the right to be the final decision maker on any dispute arising from purchases via the Deflect Protocol NFT Marketplace, including in connection with any auction or other purchase methods. With regards to License on your content, in connection with your use of the Deflect Protocol NFT Marketplace, you may be able to post, upload, or submit content to be made available through the Deflect Protocol NFT Marketplace, including NFT Media that is tied to the NFTs you wish to sell on the

Deflect Protocol Marketplace as a seller, and any other content associated with your NFTs (“Your Content”). You retain all right to your content you post, associated with your NFTs (“Your Content”). You retain all right to your content you post, upload, submit, or otherwise made available through the Deflect Protocol NFT Marketplace, except for the right expressly granted herein. In order to operate the Deflect Protocol NFT Marketplace, we must obtain from you certain license rights in your content so that actions we take in operating the NFT Marketplace are not considered legal violations. Accordingly, by using the Deflect Protocol NFT Marketplace and uploading your content or otherwise made your content available, you grant us a license to access, use, host, cache, store, copy, reproduce, transmit, display, publish, distribute, adapt and modify (for technical purposes, e.g., making sure content is viewable on smartphones as well as computers and other devices) Your content in any and all media or distribution methods (now know or later developed) but solely as required to be able to operate ad provide services of the Deflect Protocol NFT Marketplace. The Deflect Protocol

NFT Marketplace enable users mint and buy NFTs with minimal gas fees using our governance token (DEFLECT), also facilitating complete ownership transfer of NFTs acquired, and the new web will utilize AI-powered search algorithms, virtual reality (VR), augmented reality (AR) and enhanced data analytics to make this possible. Web3.0 is expected to push forth the boundaries of peer-to-peer exchange of information by taking advantage of technologies like blockchain, Internet of Things (IoT).

A large, faint, light blue watermark logo is centered on the page. It consists of a large triangle containing a grid of smaller triangles. At the bottom of this triangle, the word "DEFLECT" is written in a bold, white, sans-serif font.

DEFLECT

6. Decentralized (on-chain) Exchange

Our matching engine is capable of sustaining 1,500,000 orders / second making Deflect Protocol one of the fastest exchange in the market today. You can be certain, on our exchange, that your order will never be stuck due to the matching engine being overwhelmed.

Feature Rollout

We will roll out the platform in the following order:

- Spot trading
- Margin trading
- Futures
- Anonymous instant exchange
- Decentralized (on-chain) exchange
- and more upcoming...

Supported Coins

Deflect Protocol will support trading pairs in the following coins:

- BTC
- ETH
- LTC
- SOL
- DEFLCT (Deflect Protocol Coin)

More coins will be added over time. We generally will only add coins that have strong credibility, user base, and liquidity. If you have a coin that you wish to be listed on Deflect Protocol Exchange later, participating in our token-sale will help.

In the future, Deflect Protocol will build a decentralized exchange, where DEFLCT will be used as one of the key base assets as well as gas to be spent ensuring minimal gas fees.

7. The Conclusion

Roadmap & Future Development

Phase 1:

- Build the infrastructure of the Deflect Protocol Ecosystem
- Website Launch
- Smart Contract deployed
- 100+ Holders

Phase 2:

- Coinmarketcap Listing
- CoinGecko Listing
- Security- Audit (Certik)
- 500+ Holders

Phase 3:

- CEX Listing
- New Website Launch, Publish the whitepaper

- Airdrop Campaign
- Launch Arbitrage Trading-bot
- Token-sale
- Charity Program

Phase 4:

- Binance Listing
- Staking
- Governance
- NFT Marketplace
- Buyback DEFLCT tokens
- Large-Scale Marketing

Phase 5:

- Decentralized (on-chain) Exchange
- Optimize Holders – Reward Program
- Community Contests
- Community Growth
- More Activities and Functions in Planning

Future development

Partnerships:

Deflect Protocol will partner with several centralized exchanges, de-centralized exchanges and financial institutions to help soar the token worldwide.

Airdrop and Giveaways:

Free tokens will be given at certain times upon several task completion. This will be a promotional strategy to put Deflect Protocol in the spotlight at all times.

Blockchain Summits:

Major blockchain summits and seminars will be held in various parts of the world with sole aim of promoting and acquiring global recognition for our token.

Social Media:

Social media handles will be a significant marketing strategy for the future development of the ecosystem. As we grow, Deflect Protocol will establish ongoing partnership, exchange and market integrations throughout the crypto space to scale volume and adoption. We believe marketing is the key to adoption and plan to start a marketing campaign after the presale program has concluded. We will continue to make UI improvement to our token interface. There will be fundamental additions to the ecosystem which will make it different from everything else on the market.

Risks:

There are many risks involved in running an ecosystem. We understand this and have the skills, experience, and leadership to overcome them.

Security is Paramount:

Many crypto projects have failed due to poor security procedures. Most security breaches could have been prevented by taking simple precautions to protect critical resources. Our team has developed Deflect Protocol with security as the foremost concern in their minds. We strive to ensure that we have followed all the industry best practices when it comes to securing infrastructure and data including ISO/IEC 27001:2013² and the CryptoCurrency Security Standard (CCSS)³.

Market Competition:

We know this will be an ultra-competitive space. There are probably hundreds, if not thousands of teams wanting, planning or doing exchanges. Competition will be fierce. But in this age, this is a common risk in any decent concept/startup or mature company. The question is: given our team, experience, industry resources, and product, do you believe we stand a better chance than the rest of the pack? If yes, then please join our Token-sale.
